

Quick Reference Guide

It's like the amazon one click button

They let you buy stuff without having to select your address, credit card or any other details, it's all baked into the one click button.

What is 1-ClickTM Automation?

One click automation
for your applications &
environments.

OpsClick.com

The diagram illustrates the OpsClick interface architecture, centered around the Catalog module. The interface is divided into several functional areas:

- Launcher**: Customizes your Install or Upgrade requests.
- Catalog**: Rapidly growing catalog of OpenSource and Enterprise COTS products.
- Jobs**: Views your request for Environment or COTS Install or Upgrades.
- Assets**: Views and Searches your Assets.
- Config**: Views & Searches your Application & Environment configuration.
- Logs**: Views and Searches your Application Logs.
- Admin**: Applies Enterprise Access & Security Controls.

The Catalog module displays a grid of application cards, each with a logo, name, operating system, and a brief description. Each card includes an "INSTALL" or "UPGRADE" button. The applications listed include:

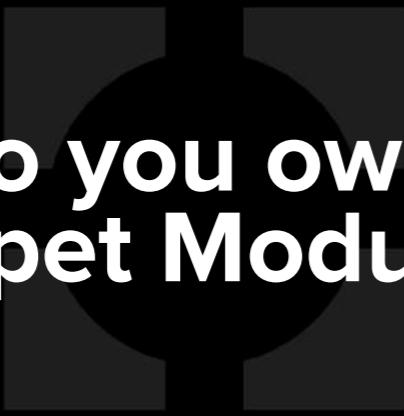

Category	Product	Operating System	Description	Action
ORACLE	Oracle 12c	Linux	Launch a new Oracle 12c Database in the Cloud	INSTALL
	Oracle 11g - 12c	Linux	Upgrade my Database on Premise	UPGRADE
Apache	Apache WebServer	Linux	Launch Apache in the Cloud	INSTALL
	OPSClick	TC Server	Linux	Launch a TC Server in the Cloud
MySQL	MySQL	Linux	Launch MySQL in the Cloud	INSTALL
	mongoDB	Mongo DB	Linux	Launch a NoSQL in the Cloud

Multi-Cloud Deployments

Use OpsClick Plugin for v-Realize to harness the power of OpsClick.com within your Enterprise Data Center or to do Multi-Cloud Deployments

OpsClick Plugin For v-Realize

A screenshot of the VMWare v-Realize interface, specifically the 'OpsClick' tab. The main area is titled 'Catalog' and displays a grid of application cards. Each card includes the application logo, name, brief description, and two action buttons: 'INSTALL' and 'UPGRADE'. The applications listed include Oracle 12c, Oracle 11g - 12c, Apache WebServer, OPSClick, TC Server, Puppet Enterprise, MySQL, mongoDB, Hadoop, JBoss, and Oracle 11g - 12c. On the left side of the catalog, there is a sidebar with options like '+ New App', 'My Apps', 'App Store', and a 'Filters' section where 'BI' is selected. The top navigation bar includes Home, Catalog, Items, Requests, Inbox, and OpsClick.
